Oji Fibre Solutions awards documentation Services to C3 NZ

C3 NZ has successfully secured a five year contract with **Oji Fibre Solutions (OjiFS)** to provide their export documentation services with work commencing in February 2021. OjiFS has been a logistics customer for C3 in New Zealand for almost 20 years.

Congratulations to the C3 Documentation Services team, led by Karen Patterson, for their efforts in helping secure this work. OjiFS were impressed by the team's excellent reputation in the industry and the level of document accuracy they achieve; in excess of 1,200 document sets are completed and provided to the bank each year with 97% submission accuracy when first presented.

November 25 2020. Edition No.19

“We are proud, happy, excited and grateful – all at the same time!” said C3 Documentation Manager, Karen Patterson.

The new work encompasses approximately 4,000 sets of export documents per year and covers: ply, timber, paper, pulp, logs and other cargo types. The team will be working closely with OjiFS on a transition plan to ensure a seamless continuation of services from the incumbent, with an aim to evolve and enhance the documentation process throughout the term of our contract.

“Securing this contract is recognition of the team’s expertise and a clear reflection of their hard work and dedication to ensure our customers’ documentation processes are handled with accuracy and efficiency,” commented C3 National Manager General Stevedoring, Murray Payne.

Well done to everyone involved in securing this work, this is a great achievement for C3 by extending our service value for our existing OjiFS partnership.

LINX, Port Kembla ensures Oak Flats Rural Fire Brigade's bright future is a safer one

The team from **LINX, Port Kembla**, recently gifted 30 new pairs of polarised safety glasses to the **Oak Flats Rural Fire Brigade**.

LINX Administration/Payroll and Accounts Officer, **Danielle Paterson's** father is a volunteer with the Fire Brigade. A recent optometrist appointment revealed that he had suffered sun damage to his eyes which led him to purchase a pair of polarised glasses.

During backburning operations, he became aware that most of his team did not have protective eyewear and was compelled to take action.

Danielle was able to provide advice based on the protective eyewear our own teams use and knowing that COVID-19 has restricted the brigade's ability to fundraise, organised LINX's sponsorship to provide her father's brigade with 30 new pairs of polarised safety glasses.

These glasses will now be part of the protective gear for the brigade when they start their backburning operations in the coming months.

Danielle's humble and significant gesture on behalf of the LINX team has expressed our shared value of *Home Safely, Every Day*, and how we demonstrate this commitment to the communities in which we operate.

LINX New K200 Fleet

LINX Logistics in Griffith, NSW, has welcomed six new Kenworth K200 Prime Mover trucks to their fleet. The LINX team have worked closely with the manufacturer to design and build trucks to meet the highest levels of reliability, safety and durability. This fleet of trucks will handle any task given to them and will travel over a million kilometres within the first three years to keep logistic supply chains moving across Australia – they are true linehaul trucks.

All of these trucks have safeguards to ensure the safety of not only the driver but other road users as well, including features such as active cruise braking, lane departure warning, electronic brake safety systems, a collision warning system and active cab entry. All this combined with a spacious cab will give the driver the most comfortable and safe journey.

"Kenworth is a favoured truck by drivers," said LINX Logistics General Manager, Wayne Alpen.

The K200's superior quality means they have an extended lifespan and are able to be redeployed across various fleet applications, resulting in excellent total cost of ownership outcomes across the fleet.

By investing in high quality equipment we are investing in our drivers and ensuring we can meet the needs of our customers.

Wayfinder

We are a proud sponsor of Wayfinder and its ongoing research and support for creating opportunities and awareness to encourage female participation in the supply chain and logistics industry.

We commend their release of the Supply Chain Career Map - a new digital career mapping tool developed in response to a capability shortage in the fast growing sector.

The map showcases more than 150 supply chain roles in 18 sectors across Australia.

The rich history of LINX Griffith, NSW

The current **LINX Logistics office in Griffith, NSW** has a rich history of former occupants and maintains a close connection to the wider Griffith region.

The site has been home to several occupants over the years:

- Established in 1973, San Bernadino Winery were the original owners.
- De Bortoli Wines took over following San Bernadino entering receivership.
- In 2002, Patrick purchased Alpen's Transport which was a 50+ year old family business owned by Ken and Eric Alpen. Brothers, Bill and Wayne, managed the business at the time and remained after the sale.
- As part of the Patrick acquisition, Eric Alpen was required to purchase a site more suitable to Patrick's requirements and it was then that this site was purchased from De Bortoli Wines and leased back to Patrick.

- In 2016, the building became home to LINX Logistics and the Alpen brothers continue their journey as current employees.

The site currently hosts 55 LINX Prime Movers, comprising of B-Doubles and B-Triples and is equipped with a warehouse and a LINX maintenance facility. Apart from a paint job from pink, to blue and white when Patrick took over, the original building remains relatively unchanged, with the original led light window still being the primary feature of the main meeting room and original storage tanks for San Bernadino wines remaining under the building.

We are proud to be a part of the history and the growth of the Griffith region and that LINX Logistics continues to ensure that the site retains its rich heritage as it evolves.

WE ARE ONE

AFLW | LINX CCG Female Leaders Session

Female leaders from across LINX Cargo Care Group in Australia joined players **Hannah Dunn** and **Tori Groves-Little** from the Gold Coast Suns AFLW team last week for an online Q&A style forum, sharing their professional experiences and reflections on their careers, particularly those forged in traditionally male dominated industries.

As part of LINX CCG's AFLW partnership and *Industry Insights Program*, the players had the opportunity to hear about our leaders' perspectives on working for LINX Cargo Care Group and the challenges and opportunities they've faced throughout their careers as women in the workplace.

Thank you to our leaders for providing such candid and valuable insights on your careers, our Group and our industry. We are proud to have Tori and Hannah on board as Ambassadors for our LINX CCG and AFLW partnership and look forward to our continued work with them.

WE ARE ONE

Around LINX CCG

Our operational teams experience some simple, moments that showcase the variety, scale and reach of our operations. Check out these great snaps:
